

LESSON 17 WORKBOOK

Freelancing with AI

Module 3: AI for Making Money

Name		Date	
Freelancing Project		Status	■ Not Started ■ In Progress ■ Complete

Lesson Purpose

Learn how freelancers can use AI to improve productivity, deliver higher-quality work, create new services, and increase earning potential while maintaining originality and professionalism.

Before You Begin

- I completed Lesson 16.
- I understand how AI productivity tools work.
- I will always review and personalize AI-generated work before delivering it to clients.

My Main Goal

Exercise 1

List five freelance services that become more efficient with AI assistance.

Exercise 2

Choose one freelance skill (writing, design, coding, marketing, or virtual assistance) and explain how AI can improve your workflow.

Exercise 3

Create a simple AI-assisted workflow from receiving a client brief to delivering the final project.

Practical Freelancing Activity

Select one freelance service you could offer online. Use AI to help you prepare a proposal, outline, draft, design concept, or client communication. Review the result and improve it before considering it complete.

Prompt Practice

Prompt: "Act as an experienced freelance consultant. Help me create a professional project proposal, estimate the work involved, and recommend the best approach for delivering excellent results to my client."

Key Takeaways

My Practical Action Step

Reflection

Completion Checklist

- Completed all workbook exercises.
- Used AI to improve a freelance task.
- Reviewed AI-generated work before client delivery.
- I am ready for Lesson 18.

Next Step

Continue to **Lesson 18 – Blogging with AI**.
